CommuniGate Pro 7.1.5 Released

2023-07-17 - Josh Olson - Product Updates

Product: CommuniGate Pro 7.1.5

Release Date: 17 Jul 2023

Download: <https://support.communiGate.com/en/downloads/7-1-x>

In this release:

- General: Updated EULA (End User License Agreement)
- General: SRS (Sender Rewriting Scheme) is now supported
- RPOP: OAuth now supported
- SMTP: SMTP session now halts immediately if message size exceeds receiving size limit
- HTTPA: 2FA (ActiveAuth) can now be enabled/disabled via the web admin interface (User Preferences)
- Pronto! 2: Cosmetic issue with adding attachments
- Bug Fix: New license keys may not be read properly
- Bug Fix: Open TCP connection to IP assigned to domain will no longer prevent domain removal (i.e. "Domain is in use" error)
- Bug Fix: Windows startup parameters set via the services panel are now working
- Bug Fix: Startup parameters (/var/CommuniGate/Startup.sh) were not working properly on FreeBSD
- Bug Fix: Startup parameters (/var/CommuniGate/Startup.sh) were not working properly on Linux (.deb)
- Bug Fix: Could not add an external filter via the Sparkle web admin interface skin
- Bug Fix: Cosmetic issue with external filter 'Add' button in Sparkle web admin interface skin
- Bug Fix: During installation for Linux (.rpm), the service would not start properly
- Bug Fix: CGP version was not displayed properly for Windows deployments

- Bug Fix: Mailing list headers and footers were not consistent based on message format (text v html)

Please Note: Version 7.1.x of CommuniGate Pro requires updated license keys. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a sales ticket [here](#).

Please Note: SRS is enabled by default in version 7.1.5. We strongly encourage you to test this functionality in a non-production environment prior to upgrading your server. If you have any questions, please open a support ticket [here](#) prior to upgrading.

Please Note: If you're using [startup parameters](#) (and/or have historically used the Startup.sh file), we strongly encourage you to review this [knowledgebase article](#).
